DC Bluetooth High Bay Sensor

Plug & Play Type

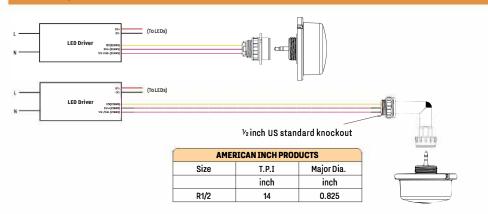

FEATURES

The Lumenativ EFS116 series designed for Luminiare Level Lighting Control (LLLC/NLC5) with integrated photocell and microwave sensors. Photocell threshold setting provides three different values for treshold On/Off. EFS116 allows machine learning to collect the current light level as treshold value. SCO1 and SCO2 provide sensor port of EFS116-AUX which is designed for pre-installation of the luminaires. EFS116 has been equiped AlgoH algorithm to maximum the detection range without false trigger.
